## PROJECT

### E-Commerce Website (Database Management)

- Designed and implemented a relational database for an e-commerce platform, optimizing product management, user transactions, and order processing.
- Checked and reported metrics such as total orders received, successful deliveries, and returns using SQL and BI tools.

### Smart Parking Sensors &Arduino (IOT)

- Developed a smart parking prototype using Arduino and ultrasonic sensors to detect vehicle presence and availability of parking spaces
- Integrated IoT components for automated monitoring, improving parking efficiency and reducing congestion.

### IOT-Elder Monitoring System (IOT)

- IoT-based Elder Monitoring System that utilizes smart sensors to track vital health parameters, movement, and environment conditions in real time.
- Designed a user-friendly frontend interface for data visualization, ensuring seamless monitoring and alerts for caregivers.
